

Intro to Syllabus Class Commands Usage

P Narashimaraja
pnarashimaraja@rvce.edu.in

R.V.C.E

July, 2026

Outline

1. Structure of a Latex document
2. Syllabus template [v1.0]
3. Installation
4. Introduction
5. Syllabus class
 - Credit-related commands
 - Semester-related commands
 - Course-related commands
6. Few Cautions
7. TexStudio Settings
8. Conclusion & Acknowledgements

Structure of a Latex document

```
\documentclass[]{\syllabus}
```

PREAMBLE Section

```
\begin{document}
```

BODY Section

```
\end{document}
```

- Packages: Include any additional packages you need to enhance the functionality of LaTeX. Packages extend LaTeX's capabilities and provide features for specialized purposes, such as graphics, tables, mathematical symbols, and citation styles.
- Title, author, and date: Set the title of your document, the author's name, and the date. This information is typically used to generate a title page or header/footer in the document.
- ...

Syllabus template [v1.0]

How to access "Syllabus template" zip file

Head to the following website:

<https://github.com/rvce-latex/syllabus>

Installation

Introduction

- Utilizes standard open-source tools:

Compiler

Miktex

<https://miktex.org/download>

Latex Editor

TexStudio

<https://www.texstudio.org/>

For Windows: **Miktex** compiler.

For MacOS: **Mactex** compiler.

For Linux: **TeX Live** compiler.

Installation setup for Windows

Basic setup files to run a latex document in your system

- **MikTeX:** It's a like C compiler
<https://miktex.org/download>
- **TeXstudio/TeXmaker:** It's a code editor, which provides more functionality than the native editor (TeXworks) that ships with MikTeX <https://www.texstudio.org/>

Next we need to setup some more tools to work with **Bibliography** and **Abbreviations** (Acronyms) in your project report.

- **JabRef:** It's a free reference manager
<https://www.jabref.org/download/win>
- **Strawberry Perl:** Tool needed to properly compile your Bibliography
<https://strawberryperl.com/>

Introduction

Introduction to Syllabus class

- Collects and typeset course syllabus information in a structured way.
- Defines consistent interface for specific programme options, departments, semesters, and scheme.
- Intended for faculty and curriculum committees to generate syllabi documents in a standardized layout with minimal manual formatting.

Introduction to Syllabus class

Semester - III	
Applied Design thinking lab	
Category: Professional Core Course	
(Common to Courses in CSE/IT/CV and CI Programs)	
(Practical)	

Course Code	CSE304L
Credits L:T:P	0:0:1
Total Hours	1:20P

Hardware requirements:

How you can get your instructions here: If you don't want it:

1. Design

Innovative Experiments

2. RAI for EL experiment

Course Outcomes: After completing the course, the

1. sample

References

[1] B. Ramani, Design of Analog CMOS Integrated Circuits, 0072040222

RUBRICS FOR THE CONTINUOUS INTERNAL E

COMPONENTS

1. **QUESTIONS**: Questions will be conducted in multiple choice mode. **QUESTIONS** will be conducted and each question will be **THE SUM OF TWO WILL BE THE FINAL**

2. **TESTS**: Students will be evaluated in test, at different complexity levels (Based on Revised) **ALL THREE** tests will be on.

3. **EXPERIENTIAL LEARNING**: Students will conduct and practical implementation of the pre teaching learning (PL). Program specific requires essential/innovative/experimentation (IE). Each **UPTO 40 MARKS**.

MAXIMUM 30

Semester - III	
Environment and Sustainability	
Category: Professional Core Course	
(Common to Courses in CSE/IT/CV and CI Programs)	
(Theory)	

Course Code	CV202A
Credits L:T:P	3:0:0
Total Hours	96

Unit - I

sample

Course Outcomes: After completing the course, the

1. sample

References

LP course type

Workflow of Syllabus class

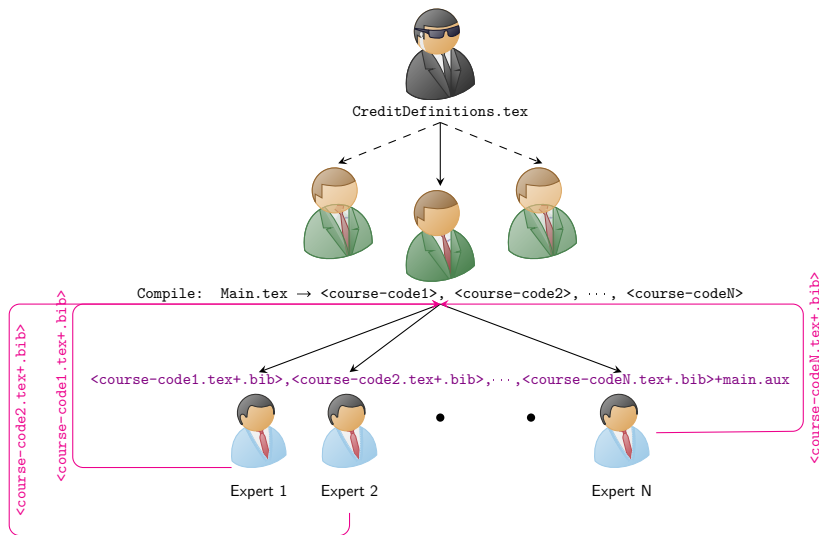

Figure: Workflow of Syllabus.cls from Dean of Academics to HOD and subject experts

Syllabus class

Syllabus class command classification

There are three Major command classifications:

1. Credit-related commands: Used by DA
 - Defines variants to the course **base** type
 - Defines LTP credit values, SEE/CIE duration+Max Marks, rubrics for CIE/SEE with marks distribution for each course-types (defined above).
2. Scheme-related commands: Used by HOD
 - Defines the course-code, course-title, category, common to, bos.
 - Assigns the appropriate course-types (defined by DA) and categories to the courses.
 - Group subject cores according to the following Category: PE, AE and PC.
 - Generate individual <course-code.tex/.bib> file from Main.tex and send it to subject expert.
3. Course-related commands: Used by Subject Experts.
 - Based on the course-type, define the content of units, practicals, course outcomes in <course-code.tex> file.
 - Add references using <course-code.bib> file.

Syllabus class
Credit-related commands

Credit-related commands: Course-type definitions

Dean of Academics (DA)

- Defines the course base types (and it's variants whenever it is required).
- Defines the L:T:P credit distributions to each course types.
- Defines the CIE/SEE Duration/Marks to each course types.
- Defines the CIE/SEE Rubrics contents with marks distributions to each course types.

Credit-related commands: Course-type definitions

```
\begin{definecredits}◀
\hrspercred{hrs/cred}◀ Defines number of hours per credit (in total credits)
\wkspercred{weeks/cred}◀ Defines the number of weeks
\Lcredmul{L cred multiplier}
\Tcredmul{T cred multiplier} }◀ Serves as a multiplier for hours per credit per week
\Pcredmul{P cred multiplier}
\begin{credit}{course base type}◀ Define one among the 4 base course-types: LO, LP, LT, PO
\variantchar{char}◀ Supports polymorphism to create variants in each base course-types.
\Lcredit{number}◀ Defines different credit combinations including variants under each base course-types.
\Tcredit{number}
\Pcredit{number}
% Durations are specified in hours (as numbers w/o any post fix)
\CIEduration{in hours} }◀ Supports different Max. duration distribution: Under each course-types
\SEEduration{in hours}
% Total final Marks of the course
\CIELmarks{number}
\CIEPmarks{number} }◀ Supports different Max. marks distribution: Under each course-types
\SEELmarks{number}
\SEEPmarks{number}
% Draws CIE rubric table at the bottom
\begin{CIErubrics}◀
\Crubric{qno}{rubric text}{marks}◀ Meant to define the rubrics for CIE in the order: <no> <content> <mark>
\end{CIErubrics}
% Draws SEE rubric table at the bottom
\begin{SEE@Theory@rubrics}[duration]◀
\SrubicA{qno}{contents}{marks}◀ Meant to define the Part A rubric for SEE Theory.
\SrubicB{qno}{contents}{marks}◀ Meant to define the Part B rubrics for SEE Theory.
\end{SEE@Theory@rubrics}
\begin{SEE@Practical@rubrics}◀ Meant to define the rubrics for SEE Practical.
\Srubic{qno}{contents}{marks}◀
\end{SEE@Practical@rubrics}
\end{credit}◀
\end{definecredits}◀
```

Credit-related commands: Example

```
\begin{definecredits}
\begin{credit}{LP} ← base course type
% \variantchar{a}
\LCredit{3}
\TCredit{4}
\PCredit{1}
\CIEduration{2}
\SEEduration{3}
\LecDuration{30}
\PracDuration{20}
\CIELmarks{100} ◀
\CIEPmarks{50} ◀
\SEELmarks{100} ◀
\SEEPmarks{50} ◀
\begin{CIERubrics} ◀
\Crubric{1}{\textbf{QUIZ...}}{10}
\Crubric{2}{\textbf{TEST...}}{40}
\end{CIERubrics}
\begin{SEE@Theory@rubrics} ◀
\SRubricA{1}{Objective ty...}{20}
\SRubricB{2}{Unit - I: Co...}{16}
\SRubricB{3 & 4}{Unit - II...}{16}
...
\end{SEE@Theory@rubrics}
\begin{SEE@Practical@rubrics} ◀
\SRubric{1}{Write-up}{10}
\SRubric{2}{Conduction}{20}
\SRubric{3}{Viva-voce}{20}
\end{SEE@Practical@rubrics}
\end{credit}
\begin{credit}{LT} ← base course type
% \variantchar{b}
\CIEduration{2}
```

```
\begin{definecredits}
\begin{credit}{L0}
\variantchar{a} ← variant: LOa
\LCredit{4}
\TCredit{4}
\PCredit{4}
\CIEduration{2} ◀
\SEEduration{3} ◀
\LecDuration{40}
% \TutDuration{}
\CIELmarks{100} ◀
\SEELmarks{100} ◀
\begin{CIERubrics}
\Crubric{1}{\textbf{QUIZ...}}{10}
\Crubric{2}{\textbf{TEST...}}{40}
\end{CIERubrics}
\begin{SEE@Theory@rubrics}
\SRubricA{1}{Objective ty...}{20}
\SRubricB{2}{Unit - I: Co...}{16}
\SRubricB{3 & 4}{Unit - II...}{16}
...
\end{SEE@Theory@rubrics}
\end{credit}
\begin{credit}{L0}
\variantchar{b} ← variant: LOb
\CIEduration{1}

1	Write Up	10
2	Conduction of the Experiments	20
3	Viva	20
TOTAL		50

Syllabus class
Semester-related commands

Semester-related commands: Course definition and course type mapping

Head Of the Department (HOD)

- Defines the course code and course title.
- Maps the course to existing course type (defined by DA).
- Defines the Category and Assigns Board of Studies for the courses offered to the different departments.
- Group courses either as Basket Course group, Professional Elective group or Ability Enhancement group, apart from standalone courses.
- Verifies the total semester credit after the inclusion of courses.
- Generate <course-code>.tex files and assigns to subject experts

Semester-related commands: Category

Map **course types** defined under *Credit-related commands* to courses with

- Course-code with Course-title
- Category (shown to the left)
- BoS, Common to and Stream

General syntax:

```
\department[short form]{long form}  
\schemeYear[UG/PG]{Year}
```

```
\begin{semester}{semester number}  
  \begin{definecourse}{course code}  
    \category{text}  
    \stream{text}  
    \commonto{text}  
    \bos{text}  
    \coursetitle[course type]{title}  
  \end{definecourse}  
\end{semester}
```

Category:

- AC: Applied Science Course
- AE: Ability Enhancement Course[†]
- BC: Bridge Course
- ES: Emerging Science Course
- ET: Emerging Technology Course
- HS: Humanities and Social Sciences
- IE: Institutional Elective
- PC: Professional Core Course[†]
- PE: Professional Core Elective[†]
- PL: Programming Language Course
- SL: Skill Lab

[†]These category courses have special wrappers

Semester-related commands: Example of Bridge Course (BC) Category

```
\begin{definecredits}
\begin{credit}{L0}◀
\LCredit{3}
\CIEduration{2}
\LecDuration{40}
\CIELmarks{100}◀
\begin{CIerubrics}◀
\Crubric{1}{\textbf{QUIZ...}}{20}
\Crubric{2}{\textbf{TEST...}}{40}
\Crubric{3}{\textbf{EXPE...}}{40}
\end{CIerubrics}
\end{credit}
\end{definecredits}
```

8	MAT149AT	Bridge Course Mathematics	MA	3	0	0	0 [†]	Theory	2	100	—	—	100	—
9	SLCSP31A	Domain Engineering Skill Lab	CS	0	0	1	1	Lab	2	—	50	3	—	50
Total							23							

[†]Audit

Semester - III						
Bridge Course Mathematics						
Category: Bridge Course						
(Common to Common to CS,CD,CY and CI Programs)						
(Theory)						
Course Code	:	MAT149AT		CIE	:	100 Marks
Credits L:T:P	:	3:0:0		SEE	:	— Marks
Total Hours	:	40L		SEE Duration	:	— Hrs

RUBRICS FOR THE CONTINUOUS INTERNAL EVALUATION		
#	COMPONENTS	MARKS
1	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted and each Quiz will be evaluated for 10 Marks. THE SUM OF TWO WILL BE THE FINAL QUIZ MARKS.	20
2	TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Based on Revised Bloom's Taxonomy Levels). THREE tests will be con	40
3	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Case study-based teaching learning (05), Program specific requirements (05), Video based seminar/presentation/demonstration (10), Tools usage (20). ADDING UPTO 40 MARKS.	40
MAXIMUM MARKS FOR THE CIE		100

Semester-related commands: Grouping courses

Supports 3 types of grouping:

- 1. Basket course group (using coregroup environment)
- 2. Ability Enhancement (AE) group (using aegroup environment)
- 3. Professional Elective (PE) group (using electivegroup environment)

Semester-related commands → category: Basket course grouping (PC)

```
\begin{semester}{semester number}
\begin{coregroup}◀
\begin{definecourse}{course code}
\category{PC}◀
\stream{text}
\commonto{text}
\bos{text}
\coursetitle[course type]{title}
\end{definecourse}
...
\begin{definecourse}{course code}
\category{PC}◀
\stream{text}
\commonto{text}
\bos{text}
\coursetitle[course type]{title}
\end{definecourse}
\end{coregroup}◀
\end{semester}
```

Syntax:

<code>\begin{coregroup}</code>	<code>\begin{coregroup*}</code>
<code>content...</code>	<code>content...</code>
<code>\end{coregroup}</code>	<code>\end{coregroup*}</code>

- Helps in creating Basket course group which accepts *only* **PC** based category courses.
- These courses will create entries in Index page (1st page) as well as in Credit page (2nd page) with \ as a separator between course-titles, course-codes and page numbers.
- This group doesn't generate any extra index page.

Example : Basket course grouping (PC)

```
\begin{semester}{3}
\begin{coregroup}
\begin{definecourse}{ea131aiX}
\category{PC}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LOa]{Elements of electronics}
\end{definecourse}
\begin{definecourse}{eb131aiX}
\category{PC}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LT]{Elements of electronics}
\end{definecourse}
\end{coregroup}
\end{semester}
```

Semester - III			
Sl. No.	Course Code	Course Title	Page No.
1	MA231TC	Linear Algebra and Probability Theory	1
2	EA131AIX / EB131AIX	Elements of electronics / Elements of electronics	2 / 4
3	EC132AXX	AE Course	6
4	EC134EXX	Advanced Electronics Group	10
5	EC131AIX	Elements of electronics	14

III SEMESTER														
Sl. No.	Course Code	Course Title	BoS	Credit Allocation			Category	CIE Duration (Hrs)	Max Marks CIE		SEE Duration (Hrs)	Max Marks SEE		
				L	T	P			Total	Theory		Lab	Theory	Lab
1	MA231TC	Linear Algebra and Probability Theory	MA	3	0	0	0 ¹	Theory	3	100	—	—	100	—
2	EA131AIX / EB131AIX	Elements of electronics / Elements of electronics	ECE / ECE	3	0	0	3	Theory	3	100	—	3	100	—
3	EC132AXX	AE Course	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
4	EC134EXX	Advanced Electronics Group	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
5	EC131AIX	Elements of electronics	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
				Total			15							

Note: The coregroup environment automatically uses the L:T:P distribution of first definecourse. In the example shown above, LOa credit is assigned to L:T:P, and the LT is not considered in the credit table.

Example: Basket course grouping (PC): Index Page

```
\begin{semester}{4}
\begin{coregroup*}◀
  \begin{definecourse}{ea131aiX}◀

Semester-related commands → category: Ability Enhancement courses

Syntax:

```
\begin{semester}{semester number}
\begin{aegroup}{common code}◀
\begin{definecourse}{course code}
\category{AE}◀
\stream{text}
\commonto{text}
\bos{text}
\coursetitle[course type]{title}
\end{definecourse}
...
\begin{definecourse}{course code}
\category{AE}◀
\stream{text}
\commonto{text}
\bos{text}
\coursetitle[course type]{title}
\end{definecourse}
\end{aegroup}◀
\end{semester}
```

```
\begin{aegroup}{common code}
content...
\end{aegroup}
```

- Helps in creating AE course group which accepts *only* **AE** based category courses.
- These courses will create entries in Index page (1st page) as well as in Credit page (2nd page) with a course titled as AE course automatically with the course-code presented as common code (1st argument of aegroup environment).
- This group does generate an extra index page grouped under title **AE courses** with course code, course title and page numbers of individual courses.

Example : AE course grouping

```

\begin{semester}{3}
\begin{aegroup}{ec132aXX}
\begin{definecourse}{ec132a01}
\category{AE}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LP]{Elements of electronics}
\end{definecourse}
\begin{definecourse}{ec132a02}
\category{AE}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LP]{Elements of electronics}
\end{definecourse}
\end{aegroup}
\end{semester}

```

Semester - III			
Sl. No.	Course Code	Course Title	Page No.
1	MA231TC	Linear Algebra and Probability Theory	1
2	EA131AIX / EB131AIX	Elements of electronics / Elements of electronics	2 / 4
3	EC132AXX	AE Course	6
4	EC134EXX	Advanced Electronics Group	10
5	EC131AIX	Elements of electronics	14

III SEMESTER														
Sl. No.	Course Code	Course Title	BoS	Credit Allocation			Category	CIE Duration (Hrs)	Max Marks CIE		SEE Duration (Hrs)	Max Marks SEE		
				L	T	P			Theory	Lab		Theory	Lab	
1	MA231TC	Linear Algebra and Probability Theory	MA	3	0	0	0 ¹	Theory	3	100	—	—	100	—
2	EA131AIX / EB131AIX	Elements of electronics / Elements of electronics	ECE / ECE	3	0	0	3	Theory	3	100	—	3	100	—
3	EC132AXX	AE Course	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
4	EC134EXX	Advanced Electronics Group	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
5	EC131AIX	Elements of electronics	ECE	3	0	1	4	Theory+Lab	1.5	100	50	3	100	50
Total				15										

Semester - III			
AE Courses			
Sl. No.	Course Code	Course Title	Page No.
1	EC132A01	Elements of electronics	6
2	EC132A02	Elements of electronics	8

Note: The aegroup environment automatically uses the L:T:P distribution of first definecourse. In the example shown above, both the credits have LP credit and hence it is assigned to L:T:P in the credit table.

Semester-related commands → category: Professional Elective courses

```
\begin{semester}{semester number}
  \begin{electivegroup}{common code}◀
    {common title}{group letter}
    \begin{definecourse}{course code}
      \category{PE}◀
      \stream{text}
      \commonto{text}
      \bos{text}
      \coursetitle[course type]{title}
    \end{definecourse}
    ...
    \begin{definecourse}{course code}
      \category{PE}◀
      \stream{text}
      \commonto{text}
      \bos{text}
      \coursetitle[course type]{title}
    \end{definecourse}
  \end{electivegroup}◀
\end{semester}
```

Syntax:

```
\begin{electivegroup}{common code}{common
  title}{group letter}
  content...
\end{electivegroup}
```

- Helps in creating PE course group which accepts *only* **PE** based category courses.
- These courses will create entries in Index page (1st page) as well as in Credit page (2nd page) with a course title given as common title (2nd argument of electivegroup environment) with the course-code presented as common code (1st argument).
- This group does generate an extra index page grouped under title **Group <group letter>** with course code, course title and page numbers of individual courses.

Example : PE course grouping

```
\begin{semester}{3}
\begin{electivegroup}{ec134eXX}
{Advanced Electronics Group}{A}
\begin{definecourse}{ec132e01}
\category{PE}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LP]{Elements of electronics}
\end{definecourse}
\begin{definecourse}{ec132e02}
\category{PE}
\stream{EC}
\commonto{Common to EC, EI, EE Programs}
\bos{ECE}
\coursetitle[LP]{Elements of electronics}
\end{definecourse}
\end{electivegroup}
\end{semester}
```

Semester - III			
Sl. No.	Course Code	Course Title	Page No.
1	MA231TC	Linear Algebra and Probability Theory	1
2	EA131AIX / EB131AIX	Elements of electronics / Elements of electronics	2 / 4

Semester - III			
Advanced Electronics Group			
GROUP-A			
Sl. No.	Course Code	Course Title	Page No.
1	EC132E01	Elements of electronics	10
2	EC132E02	Elements of electronics	12

Note: The aegroup environment automatically uses the L:T:P distribution of first definecourse. In the example shown above, both the credits have LP credit and hence it is assigned to L:T:P in the credit table.

Syllabus class

Course-related commands

Semester-related commands: Course definition and course type mapping

- Receive `<course-code>.tex` and `<course-code>.bib` files from HOD
- Defines the unit-wise lecture contents for course-types: LO, LT and LP.
- Defines the practical experiment list for course-types: PO and LP.
- Defines the list of course-outcomes.
- Use reference manager to build the references for a particular course and uses the citation keys to add references inside `<course-code>.tex` file.
- Return both the files back to HOD, which HOD uses to compile the syllabus book for that year students.

Course-related commands: Lecture Syntax

Subject experts defines

- Lecture units (in LO, LT, LP based course types)

```
\begin{units}  
  \unit[hours]{content}  
\end{units}
```

```
\begin{units}  
  \unit[8]{\textbf{BJT:}}\\  
  Review of BJT Amplifiers: The Common collector  
    amplifier, Emitter Follower, Darlington pair,  
    discrete amplifier design problems.\\  
  \textbf{MOS Field Effect Transistors (MOSFETs):}\\  
  Device structure and physical operation, current  
    voltage characteristics, Transfer  
    characteristics (both N-MOS and P-MOS), finite  
    output resistance in saturation. MOSFET circuits  
    at DC, Biasing in discrete MOS amplifier  
    circuits}  
  \unit[8]{\textbf{MOSFET amplifier:}}\\  
  Small signal operation and models: The DC bias point,  
    The signal current in the drain terminal, The  
    voltage gain, The small signal equivalent  
    circuit model, The trans conductance, body  
    effect, The common source amplifier (with  
    resistive load, diode connected load, current  
    source load).}  
\end{units}
```

Unit - I	8 Hours
BJT: Review of BJT Amplifiers: The Common collector amplifier, Emitter Follower, Darlington pair, discrete amplifier design problems. MOS Field Effect Transistors (MOSFETs): Device structure and physical operation, current voltage characteristics, Transfer characteristics (both N-MOS and P-MOS), finite output resistance in saturation. MOSFET circuits at DC, Biasing in discrete MOS amplifier circuits	
Unit - II	8 Hours
MOSFET amplifier: Small signal operation and models: The DC bias point, The signal current in the drain terminal, The voltage gain, The small signal equivalent circuit model, The trans conductance, body effect, The common source amplifier (with resistive load, diode connected load, current source load).	

Course-related commands: Practical Syntax

Subject experts defines

- Practical units (in LP and PO based course types)

```
\begin{practicals}  
  \practicetitle{title}  
  \practiceinstruction{instruction text}  
  \experiment{content}  
  \begin{subpracticals}  
    \subexperiment{content}  
  \end{subpracticals}  
  \experiment[tag]{content}  
\end{practicals}
```

Example in Next slide ...

Course-related commands: Practical Syntax (cont.)

```
\begin{practicals}
\practicetitle{Practicals: Hardware Experiments}
\practiceinstruction{Here you can put your
    instructions here. If you don't want this
    instruction, simply comment this line.}
\experiment{Characteristics of NMOS transistor (VI and
    Transfer)}
\experiment{Design and testing of RC phase shift
    oscillator.}
\experiment{Wien bridge oscillator circuits using
    operational amplifier.}
\experiment{Design \& testing of an RC coupled
    amplifier using BJT in CE configuration.}
\experiment{Design \& testing of LC Oscillators.}
\begin{subpracticals}
\subexperiment{Design and Performance Analysis of
    Hartley oscillator.}
\subexperiment{Design and Performance Analysis of
    Colpitts oscillator.}
\end{subpracticals}
\experiment{Design and testing of class B power
    amplifier circuits.}
\practiceeltitle{Innovative Experiments}
\experiment[EL]{R-2R Digital-to-Analog Converter.}
\experiment[EL]{Successive Approximation ADC.}
\end{practicals}
```

Practical's: Hardware Experiments

Here you can put your instructions here. If you don't want this instruction, simply comment this line.

1. Characteristics of NMOS transistor (VI and Transfer)
2. Design and testing of RC phase shift oscillator.
3. Wien bridge oscillator circuits using operational amplifier.
4. Design & testing of an RC coupled amplifier using BJT in CE configuration.
5. Design & testing of LC Oscillators.
 - a) Design and Performance Analysis of Hartley oscillator.
 - b) Design and Performance Analysis of Colpitts oscillator.
6. Design and testing of class B power amplifier circuits.

Innovative Experiments

7. [EL] R-2R Digital-to-Analog Converter.
8. [EL] Successive Approximation ADC.

Course-related commands: CO Syntax

Subject experts defines

- Course outcomes

```
\begin{courseoutcomes}  
  \co{content}  
\end{courseoutcomes}
```

```
\begin{courseoutcomes}  
  \co{Analyze the working of devices like MOSFETs and  
      OPAMPs.}  
  \co{Illustrate the working of precision rectifiers  
      and amplifiers.}  
  \co{Apply the knowledge to design amplifier,  
      precision rectifier and waveform generators.}  
  \co{Evaluate electronic sub systems with respect to  
      the desired specifications.}  
\end{courseoutcomes}
```

Course Outcomes: After completing the course, the students will be able to:
1. Analyze the working of devices like MOSFETs and OPAMPs.
2. Illustrate the working of precision rectifiers and amplifiers.
3. Apply the knowledge to design amplifier, precision rectifier and waveform generators.
4. Evaluate electronic sub systems with respect to the desired specifications.

Course-related commands: Reference Syntax

Subject experts defines

- Added references using citation keys

```
\begin{references}  
  \reference{bibkey}  
\end{references}
```

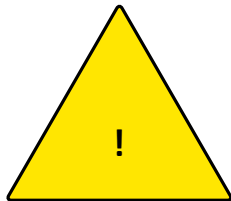

```
\begin{references}  
  \reference{Sedra2007}  
  \reference{Razavi2014}  
  \reference{Millman2010}  
  \reference{Boylestad2021}  
\end{references}
```

Few Cautions

Cautions w.r.t File usage

- Don't every change the name of `Main.tex` file.
- Before distributing `<course-code>.tex/.bib` files to Subject Experts, any change in Credits, Rubrics or Course order list will impact the compilation with Errors.
 - Sol.: Better delete All the `<course-code>.tex` as well as `<course-code>.bib` generated files.
 - Delete `Main.aux` file.
 - Recompile the `Main.tex` file again and share `<course-code>.tex + <course-code>.bib + Main.aux`.

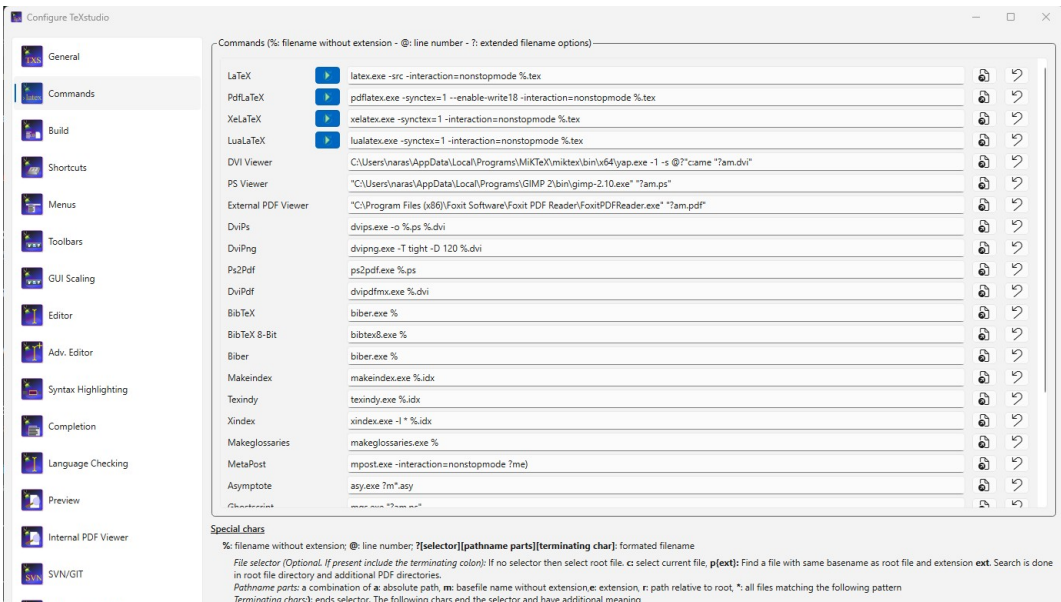

Cautions w.r.t contents

- Don't use & symbol directly in the text contents, you can use it as \&.
- Don't directly copy paste the contents, it may have unicode.
 - Sol.: Google search for "unicode online detector".
 - Replace the characters and paste the final text.

TexStudio Settings

TeXStudio Configuration setup

The screenshot shows the 'Configure TeXStudio' dialog box with the 'Commands' tab selected. The left sidebar lists various configuration categories, and the main area displays a list of commands with their corresponding executables and options. A 'Special chars' section is visible at the bottom.

Configure TeXStudio

Commands (%: filename without extension - @: line number - ?: extended filename options)

Command	Executable/Options	Icon	Reset
LaTeX	latex.exe -src -interaction=nonstopmode %.tex		
PdLaTeX	pdflatex.exe -synctex=1 --enable-write18 -interaction=nonstopmode %.tex		
XeLaTeX	xelatex.exe -synctex=1 -interaction=nonstopmode %.tex		
LuaLaTeX	lualatex.exe -synctex=1 -interaction=nonstopmode %.tex		
DVI Viewer	C:\Users\naras\AppData\Local\Programs\MiKTeX\miktex\bin\x64\yap.exe -1 -s @"?*.dvi"		
PS Viewer	"C:\Users\naras\AppData\Local\Programs\GIMP 2\bin\gimp-2.10.exe" "%am.ps"		
External PDF Viewer	"C:\Program Files (x86)\Foxit Software\Foxit PDF Reader\FoxitPDFReader.exe" "%am.pdf"		
DviPs	dvips.exe -o %.ps %.dvi		
DviPng	dvipng.exe -T tight -D 120 %.dvi		
Ps2Pdf	ps2pdf.exe %.ps		
DviPdf	dvipdfmx.exe %.dvi		
BibTeX	biber.exe %		
BibTeX 8-Bit	bibtex8.exe %		
Biber	biber.exe %		
Makeindex	makeindex.exe %.idx		
Texindy	texindy.exe %.idx		
Xindex	xindex.exe -l * %.idx		
Makeglossaries	makeglossaries.exe %		
MetaPost	mpost.exe -interaction=nonstopmode ?me)		
Asymptote	asy.exe ?m*.asy		
Ghostscript	gswin32.exe "%am.ps"		

Special chars

?: filename without extension; @: line number; ?[selector][pathname parts][terminating char]: formatted filename

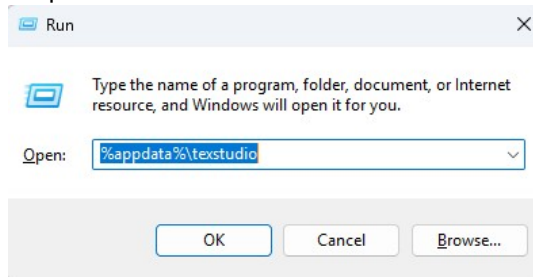

File selector (Optional. If present include the terminating colon): If no selector then select root file. c: select current file, p(ext): Find a file with same basename as root file and extension ext. Search is done in root file directory and additional PDF directories.

*Pathname parts: a combination of a: absolute path, m: basefile name without extension, e: extension, r: path relative to root, *: all files matching the following pattern*

Terminating chars: ends selector. The following chars end the selector and have additional meaning

TexStudio Auto-completion setup

Step 1:

Step 2: Open the completion → user folder and paste syllabus.cwl file into it

Step 3: In TexStudio, click on Options → Configure TexStudio → Completion and search for Syllabus

Thank you

Thank you for your time and attention!

Special thanks to:

Dr M.V. Renukadevi, Professor and Dean of Academics - For supporting the development.

Dr. N. Ramavenkateswaran, Assistant Professor, Dept. of ECE - For planning and guiding.

Dr Veena Gadad, Associate Professor, Dept. of CSE - For guiding and debugging.
